PuriCore signs additional endoscope reprocessor marketing partnership

Sterilox Endoscopy and BHT to offer complete solutions for high capacity endoscope reprocessing in the UK

PuriCore (LSE: PURI), the life sciences company focused on the development and commercialisation of its novel, safe antimicrobial technology, today announces that its Sterilox Endoscopy division has established a sales and marketing partnership with BHT Hygienetechnik GmbH, the Frost and Sullivan award winning manufacturer of endoscope reprocessors and channel checking systems (INNOVA[®] CC).

This new partnership significantly enhances PuriCore's product portfolio. The combination of Frost and Sullivan award-winning technologies from Sterilox Endoscopy and BHT will deliver amongst the fastest and safest large pass through reprocessing systems in the UK. The deal ensures that PuriCore and BHT can respond to their clients' need for high quality infection control.

This joint approach is proving successful, and a number of orders have already been confirmed and reprocessing systems are due to be installed over the coming months.

This deal follows last month's announcement that PuriCore had signed an exclusive distribution agreement with Minntech Corporation, one of the world's leading manufacturers of automated endoscope reprocessors.

Greg Bosch, Chief Executive of PuriCore, said:

"PuriCore is pleased to announce another partnership with a world-class AER manufacturer. The integration of our technologies provides significant cost-saving benefits to our NHS customers and further strengthens our position as the UK's leading provider of endoscopy reprocessing systems".

Dr. Annecke, CEO and Managing Director of BHT, said:

"The joint effort allows BHT to expand its existing offerings in the UK market for high level disinfection solutions in the most sensitive field of reprocessing flexible endoscopes."

Notes to Editors: Sterilox Endoscopy is a division of PuriCore.

About PuriCore

PuriCore (LSE: PURI) is a life sciences company focused on the development and commercialisation of its proprietary technology that mimics the production by the human body of its natural anti-microbial, hypochlorous acid. Hypochlorous acid is highly effective at killing pathogens such as bacteria, viruses and fungi and yet is safe and environmentally friendly. PuriCore's solutions have applications in a wide range of markets where it is important to control microbial contamination. These markets include medical device disinfection, food safety, dental equipment decontamination, environmental remediation, hospitality, water safety, wound management and other applications intended to limit the spread of infectious disease, including major global disease threats such as Tuberculosis, MRSA, Influenza, E.coli, Norovirus, HIV, polio, Hepatitis A, H.pylori and Legionella.

PuriCore markets a portfolio of branded systems which produce hypochlorous acid solutions on-site at a customer's location from water, electricity and common salt. These solutions are generated at a range of concentrations and at a nearly neutral pH range similar to the human body. They are effective as soaks, sprays, mists and in other forms.

PuriCore is headquartered in Malvern, Pennsylvania with offices in Stafford, UK.
